

Research Associate Wanted!

The Lehmann lab at Skirball Institute at NYU School of Medicine and HHMI is looking for a research associate with strong background in **biology and coding in R** to join our team. We are specifically looking for a BS or MS degree holder willing to work in a dynamic and collegial environment.

We are using cutting edge **single cell RNA-seq** technology to study how **stem cell** specification and self-renewal is regulated by the niche and other support cells. We use *Drosophila* ovaries as a model.

Please, contact Ruth.Lehmann@med.nyu.edu and Maija.Slaidina@med.nyu.edu.
