Proteomics Laboratory Research Technician Position Available: January 2020

A full-time research technician position is available in an independent proteomics research group at Weill Cornell Medical College. The primary duties of this position are to support the daily workings of the laboratory. However, the ideal candidate will also be an active participant in laboratory research and will have the opportunity to pursue independent projects.

**Basic duties include:** sample preparation for mass spectrometric analysis, data analysis, preparing solutions, ordering and maintaining stocks of laboratory supplies, maintaining the state of the laboratory space, light administrative tasks.

**Duties**
- protein/peptide sample preparation
- data acquisition, analysis, and report generation
- preparing stock solutions, stocking laboratory
- maintaining an orderly laboratory work environment
- experimental planning and design
- light administrative including ordering and maintaining a chemical inventory

**Requirements**
* Bachelor’s or Master’s degree in chemistry, biochemistry, cell biology, bioinformatics, or related field
* A strong interest in molecular biological science
* At least 1 year (or 2 summers) of related laboratory experience
* Strong organizational, planning, and record-keeping skills
* Strong computer skills - knowledge of excel, mathematica, matlab, R or basic coding experience is desirable
* Excellent written and verbal communication skills.
* Attention to detail and good interpersonal skills.
* Preference given to those with previous HPLC or Mass Spectrometry experience

A two-year commitment is preferred.
